

forcebalance.nifty.commadash

```
graph LR; A[forcebalance.nifty.commadash] --> B[forcebalance.nifty.segments]; A --> C[forcebalance.nifty.encode];
```

The diagram illustrates a hierarchical structure. A root node, labeled 'forcebalance.nifty.commadash', is shown in a gray box. Two blue arrows originate from the right side of this root node, pointing to two separate child nodes. The top child node is labeled 'forcebalance.nifty.segments' and the bottom child node is labeled 'forcebalance.nifty.encode'. Both child nodes are contained within white boxes with black borders.
